

OnLineMediaAndTheirUse/Presentation01

PPT presentation  Use of Internet Technologies

Introduction

Ice-breaking

We are going to watch this video: <http://viscog.beckman.illinois.edu/flashmovie/15.php> The video requires java active in your browser, and is about 7 Mb in size (It will take sometime to download). There will be several students who are wearing black and white shirts. And they will pass two balls to each other. Take out a blank paper. And count how many passes did those who wear white shirts make in the film? You should count only white people's passes, not black shirts.

i keep defending your as-piration for your doings
was trying to see the good in you oh oh
- [<http://www.youtube.com/user/babiixi?blend=1&ob=4#p/u/17/WubkuyVmXKQ> from 2ne1 - I Don't C

my only path straight ahead, is filled
with raging storms that you made
but thru all the tears that i have cried,
the rain could not drown me in more pain
i'm lead to the edge, the edge of this world,
the only way out i found is down
tried to turn back but you pushed,
i'm falling deeper into nowhere
lost and gone . . .

Today's discussion

- The open nature of the internet
- Using technologies
 - Portal
 - Blog
 - Wiki

Internet as open technologies

인터넷이 다른 매스미디어와 다른 점

 The medium that is different from other media (<http://docs.google.com/a/commres.org/presentation/view?id=0AR-90gpuBHgjYWNtOGJqdnpzNGpyXzQzZ3ozbWNzcHI&hl=en>)

사용자 맞춤형 서비스

 Commres.org admin (<https://www.google.com/a/cpanel/commres.org/Dashboard>)
iGoogle

Open nature of the Internet

Point is that the Internet has been built on open atmosphere for long time. It has its own historicity and social characteristics. Such aspects have influenced how the technologies were developed. And on the path to now, there have been many scientists and scholars who aimed at welfare of us, human being. And such atmosphere was absent in Korea. The lack of it has caused many issues such as portal business, privacy, commerce, etc.

-  Usenet
-  GutenbergProject
-  FreeSoftware
 -  GNU manifesto (<http://www.gnu.org/gnu/manifesto.html>)
-  WWW and  TimBerners-Lee?action=show#s-1
- See  InternetDevelopment#s-1.3

How do you use it?

-  Using portal
-  Using blog
-  Using wiki

Maybe some other forms of communicating. . . such as microblogging ( [twitter](http://twitter.com/) (<http://twitter.com/>) or  [Me2day](http://me2day.com) (<http://me2day.com>))
